It is our Mission to provide our customers with peace of mind through the provision of high quality vehicle repair and maintenance solutions and we're committed to your satisfaction and your car's performance.

When You Want Your Car Fleet To Perform At Its Best

Our factory-trained technicians and Class 'A' Mechanics will ensure that your car is well taken care of and tuned to perform at its best. Our people skills will ensure that you're kept in the loop. You won't hear any surprises when it comes time to pay and we'll always make sure we're on the same page before we proceed with your repairs.

Our Mechanics Welcome All Makes and Models

From scheduled maintenance to emergency repairs, we care for our customers like family. We'll see to it that you receive the best care and service for your car, whether it's a performance import or a hand-me-down clunker.

Never want to forget an appointment? Sign up for our Maintenance Reminders and you'll hear from us when it's time for your car's next service. And if you don't see what you're looking for in the list below, give us a call. This is only part of our Auto Services Menu.

At Collegeway Auto Service, we proudly perform the following auto services for your vehicle:

- Oil, Lube and Filter Service — the standard is to have this done every 6,000KM or 3 months, whichever comes first.
- Vehicle Maintenance Inspections — not sure whether your car needs maintenance? Check out our generalized auto maintenance schedule to get an idea of the regular services your car needs to perform at its best in all conditions.
- Scheduled Auto Maintenance that is compatible with most manufacturer's warranty programs — ask us and we'll let you know whether your warranty allows outside, or non-dealer, services. Most do.
- Brakes — it can be hard to pinpoint the most important maintenance for your car, but brakes are definitely up there. We'll check your brakes and let you know if they need servicing. Beyond performance, brakes are essential for your family's safety.
- Exhaust — problems with your exhaust can be a health issue as well as an embarrassing noise issue as you drive around town. Bring your car in and we'll diagnose the trouble and tell you how we can fix it.
- Air Conditioning — from a flush to a full replacement, we'll keep your car's air conditioning humming along, and your family nice and cool, on the hottest of summer days.
- Tires mounted and balanced on premises. We also offer front and four-wheel alignments for all makes and models. Talk to us about the right rims and tires for your car or SUV.
- Suspension modifications — see us for a smoother ride.

Not sure what the problem is? Engine light on? We have complete diagnostics available with the latest scanning technology

Buying or selling a vehicle? Or just re-qualifying for your Drive Clean certificate? We have emissions preparation and compliance services as well as MTO Safety Inspection and Certification services.

VEHICLE FLEET MAINTENANCE REPORTING PACKAGE

Preventive Maintenance

Our Fleet Maintenance package makes it easy to see when an automobile, truck, or other piece of equipment is due for service. Automated and color-coded preventive maintenance (PM) alerts will automatically display each time you start the program. Vehicle due (or overdue) for service will be shaded "red," while vehicle soon due for service will be shaded "yellow". You'll know immediately where your fleet stands at any given time.

Fleet Maintenance package provides a wide range of preventive maintenance services that are already defined for you. However, you can easily customize the list or create your own maintenance schedules based on the tracking requirements of your fleet. We can track your PM by date, mileage, hours, or kilometres.

Repair Maintenance

Tracking repair maintenance is just as important as tracking preventive maintenance. Keeping track and monitoring trends in repair maintenance can help you decide whether to keep or retire a vehicle or piece of equipment. With our Fleet Maintenance Pro, your maintenance and repair records are captured automatically. In addition to preventive maintenance scheduling, our software logs and can schedule repairs for unexpected problems that drivers encounter.

History Recording

Tracking history is one of the most vital tasks when managing a fleet. Good records can be used to analyze costs, and monitor trends in wear, neglect and abuse of your vehicles. And historical information can be the determining factor when you decide to keep or retire a vehicle. When we perform maintenance activities on your fleet, our software keeps track of all of the important details. The software generates a preventive and repair maintenance history that lists all of the maintenance performed on your equipment. This report includes the costs of preventative maintenance, repairs, parts, labour, taxes, and more.

In addition, we can provide a wealth of history reports that can be used to analyze your history data over time, to establish the vehicle's cost effectiveness to your company. Even insurance Companies are interested in this information and may reduce premiums based on this. We know how important reports are to your vehicle fleet maintenance management work.

Flexible Reporting

Unfortunately, most auto repair companies take this lightly and include inadequate reporting modules in their software. This is where Fleet Maintenance Pro excels. We give you more than reports at your fingertips. From simple fleet listing reports to detailed periodical cost analysis reports, everything you need is included. There is also a report editor tool that lets you easily make adjustments to any of the stock reports included with Fleet Maintenance Pro.

Summary Recommended Maintenance Schedule

Basic Preventative/Scheduled Maintenance intervals are recommended by the industry to ensure continued, reliable operation of your vehicle. These typically fall into four basic service levels which repeat over the life of your vehicle:

- **Minor Vehicle Service Interval (approx. every 5,000 – 6,000 KM)**
 - Basic fluids & filters, general vehicle inspection
- **Intermediate Vehicle Service Interval (approx. every 10,000 – 12,000 KM)**
 - Basic fluids & filters, tire rotation and complete inspection of undercar systems
- **Major Vehicle Service Interval (approx. every 20,000 – 24,000 KM)**
 - Occurs at manufacturers recommended intervals and includes a comprehensive service of all major vehicle operating systems and an accompanying comprehensive vehicle inspection
- **Specific Periodic Vehicle Services (as required)**
 - Certain system maintenance does not occur at every interval and needs to be addressed individually at the appropriate intervals (eg. Timing Belts, Transmission, Fuel Injection).

We have your fleet vehicles' specific maintenance schedules available.
